

HOW TO CHANGE THE OWNERSHIP OF THE FILE

-> For changing the username : `chown user_name filename`

-> For changing the groupname : `chgrp user_name filename`

TASK1

1. Create a group called as 'task_force' as default user.
2. Add 3 users in the system : user1 , user & user3 as default user.
3. Create a file 'task1'.
4. Add those 3 users in the task_force group.
5. Switch to user1 (w/o the home dir) & try to access the file 'task1'.
6. Change the file ownership of group to 'task_force'. -> `su vboxuser -> sudo chgrp task_force task1`

TASK2

1. Create a directory as default user.
2. Create 3 files in it, (file1.txt, file2.txt & file3.txt)
3. Write some data in file2.txt.
4. Add user user1 & user2 (if already done, skip)
5. Change the required permission of file2.txt & also the directory, so that user2 can edit the file.
6. Change the ownership of file1 to user1.

```
su - user2
pwd -> /home/user2
```
